DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

Claims 1-40 are allowable over the prior art of record because the prior art of record fails to teach or fairly suggest that an external database comprises a user's profile information, a local memory for storing a compact definition of a schema for the external database, data source information that describes how to connect and communicate with the external database, an SQL statement extracts properties from the external database corresponding to the compact definition, a foreign key that identifies a record in the external database, and positional information for each foreign key and providing access to the user's profile information by using the local stored information, as argued by the applicants in the response received on 7/19/04, page 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
